Forecast for Sunday 05 May 2024

Weather: A chilly and bright start to the day, with some shallow mist or fog patches possible in the valleys. A dry and sunny morning with cloud amounts slowly increasing from mid-morning. Cloudier with some outbreaks of showery rain moving northwards during the afternoon, with cloud lowering on south facing slopes. Becoming largely dry, but staying mostly cloudy into the evening.

Chance of cloud-free hill tops above 600m: 65%, highest peaks covered at times during passage of showery rain.

Low cloud and visibility: Patchy cloud at 500-600m occasionally bringing poor visibilities to the highest peaks, mostly in association with the showery rain.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Due to the time of year UV levels are currently moderate or high, therefore care should be taken to avoid sunburn. Sun hats and cream are advised. After recent rain, some routes could still be rather wet or slippery under foot.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Sun 05 May 2024	0mm	9.8mm	21.8mm

Forecast for Monday 06 May 2024

Weather: A dry and bright start with plenty of morning sunshine. Cloud bubbling up into the afternoon as scattered showers develop, some turning heavy and possibly thundery at times.

Maximum wind: Northerly 10-20 mph, isolated gusts to 30 mph near showers.

Chance of cloud-free hill tops 600m: 60% highest peaks temporarily shrouded on the passage of showers.

Low cloud and visibility: Mostly very good visibility, temporarily reducing to poor on the passage of any showers.

Temperature: **Valleys:** 18 C
At 600m: 12 C
Freezing level: Above summits.
